

HELP US HELP THEM

SUPPORT OUR STUDENTS

The Castaic Education Foundation is a non-profit organization composed of community volunteers who raise funds so that teachers can provide the most comprehensive and innovative education to students enrolled in the Castaic Union School District. The funds are provided to teachers in the form of grants. Teachers who have great ideas but lack the financial resources to implement them apply for the grants, whose funding is determined after a thorough review process.

HELPING **STUDENTS** ONE TEACHER AT A TIME

Nurturing our most precious resource – our children.

The Castaic Education Foundation exists to support the students of the Castaic Union School District by providing funding for programs, equipment and technologies that otherwise would not be funded through normal school operations. As a registered 501c3 non-profit organization, the Foundation directly benefits the District, its educators and its students by assisting in the achievement and maintenance of a superior program of public education. The Foundation organizes a variety of events and programs whose sole purpose is to raise funds for all schools within the District. Funds are disbursed via a competitive grant program. The Foundation awards grant funds to teachers who successfully demonstrate both an educational need within the District and a tangible solution that will enhance the learning experience of our students.

‘There is a brilliant child locked inside every student.’

– MARVA COLLINS, EDUCATOR

HISTORY OF THE FOUNDATION

The Castaic Education Foundation was established in 1994. The Board of Directors consisted of 12 volunteers, the District’s Superintendent and Business Manager. The Board has contributed thousands of dollars in direct classroom aid to the students of the District via a structured grant-application process.

FOCUS ON TECHNOLOGY

A large part of our mission is ensuring our schools have access to the latest technology, giving our students the competitive edge they need for academic success now and in the future. The Foundation has achieved its goal of providing a computer lab at each of our elementary schools. In addition, we have provided funds for replacement computers, updated technology and computer skills training. This investment is in direct response to our teachers, who recognized needs and articulated them in the form of grant requests.
